SUMMARY

Mohammad Riyad Al-Eiadeh received his Ph.D. in Electrical and Computer Engineering from the Elmore Family School of Electrical and Computer Engineering at Purdue University in 2026. He earned his B.Sc. and M.Sc. in Computer Science from Al-Balqa Applied University in 2018 and Yarmouk University in 2021, respectively. His **research** focuses on **Graph Machine Learning, Graph Computations, Adversarial Machine Learning, Adversarial Attacks on Graph Embeddings and Graph Structures, Robust and Resilient Graph Learning, Matrix Perturbation Theory, Complex Networks, Dynamic Networks, Tensor Product of Graphs, Higher-Order Graphs, and Cybersecurity (Interdependent Systems modeled as Attack Graphs)**. He has experience in optimization problems such as graph embedding and scalable graph analytics. He is interested in learning on graphs, Java, multi-threading, functional programming, and data structures, and is passionate about solving complex challenges in computer science, AI security, and resilient intelligent systems. Contact him at maleiade@purdue.edu.

EDUCATION

8/2023 - 6/2026	Purdue University, Indiana, USA Ph.D. in Electrical and Computer Engineering, 90 credit hours Thesis Fields: Cybersecurity, Graph Algorithms, Attack Graphs, Resource Allocation, Machine Learning	School
9/2019 - 7/2022	Yarmouk University, Irbid, Jordan Masters' in Computer Science, 32 Credit Hours Thesis Fields: Feature Selection, Evolutionary Algorithm, Machine Learning	School
9/2015 - 7/2018	Al-Huson University College Al-Balqa Applied University, Irbid, Jordan Bachelors' in Computer Science, 132 Credit Hours Project Fields: Android, Arduino, Smart Home	School

EXPERIENCE

8/2023 - Present	Graduate Researcher & Software Developer • Securing Interdependent Systems: Developing graph-theoretic and graph-learning-based models for protecting interdependent systems represented as attack graphs.	Advisor: Dr. Mustafa Abdallah
1/2026 - Present	Graduate Teaching Assistant • Assisting in Communication Network Design & Advanced Network Security ; grade homework and laboratory assignments, Provide academic support and hold office hours.	Courses: CIT 44000, CIT 40600 — Purdue University
8/2025 - 12/2025	Graduate Teaching Assistant • Assisted in Java programming , mentoring students in OOP, basic GUI development, and problem solving ; evaluated coursework and provided technical support during lab sessions.	Course: CNIT 25501 — Purdue University
1/2025 - 5/2025	Graduate Teaching Assistant • Mentored students in programming laboratories, assisting with data structures, algorithms, and debugging , and providing technical guidance during lab sessions.	Purdue University
8/2024 - 12/2024	Graduate Teaching Assistant • Supported instruction in Python and MATLAB for first-year engineering students, helping develop computational thinking and engineering problem-solving skills.	Course: ENGR133 — Purdue University

- Developed hybrid **evolutionary optimization algorithms** for NP-hard combinatorial problems, including **Maximum Clique (DIMACS)**, **Feature Selection** & **0–1 Knapsack**.

AWARDS & HONORS

- 7/2023 **School of Engineering and Technology, Purdue University, IN, USA**
Graduate Research Assistant-ship, PhD in ECE at E & T Department
- 6/2018 **Al-Huson University College, Al-Huson, Jordan**
Academic Excellence Award - Ranked 1st in my class for academic performance

PHD COURSES

ECE 62900 – INTRO NEURAL NETWORKS
ECE 66200 – PATTN RECOG / DECIS PROC
MA 51100 – LINEAR ALGEBRA APPL
ECE 58000 – OPT METH FOR SYS & CON
ECE 59500 – INTRODUCTION TO GAME THEORY
MA 57500 – GRAPH THEORY

PROJECTS

Software Project

GraphEmbedding4j: In-progress Java library for graph / node embedding research, with modular components for random walks, context-window extraction, negative sampling, skip-gram learning, gradient descent optimization, and sigmoid-based loss modeling.
